&lt; 7 of 10 &gt;

Singaporean company Bluetree Electronics has built what it claims to be the world's smallest touchscreen MP3 player, easily fitting into the palm of your hand. Called the Kube2, the tiny device uses microSD cards and supports up to 32GB of storage space. Its standard colour is silver, but you can swap that for a selection of other skins, if you prefer. Currently you can only buy the Kube2 from 7-11 stores in Singapore, but UK distributor Orca plans to release it out into the wild in the UK in February for \$90.
